## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/21/2002 has been entered.

The preliminary amendment filed 09/21/2002 with the request for continued examination has been entered. As a result claims 1-13, 15-28, 30 and newly added claims 31-34 are pending; claims 14 and 29 being cancelled. It is noted that the preliminary amendment filed with the request for continued examination was not presented in any previous communication after the final office action. Hence a restriction requirement necessitated by the amendment is proper and is set forth below.

### *Election/Restrictions*

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-4, 10, 16-19, 25, 31 and 32, drawn to a method and system for allowing a user to select a user interface, classified in class 463, subclass 23.
  - II. Claims 5-9 and 20-24, drawn to a method and system for displaying wagering options, classified in class 463, subclass 31.
  - III. Claims 11-13, 26-28, 33, and 34, drawn to a method for displaying and selecting elements with highlighting, classified in class 345, subclass 1.
  - IV. Claims 15 and 30, drawn to a method for saving wagering information, classified in class 463, subclass 29.

Application/Control Number: 09/330,651

Art Unit: 3713

3. The inventions are distinct, each from the other because of the following reasons:

The inventions are distinct each from the other because inventions I-IV are prima facie independent and distinct inventions due to their recitations of distinct and specific structures. Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. Invention I has the utility of being used as a stand alone interface without the necessity for a specific layout as in Invention II, the specific selection process as in Invention III or the ability to use user options in subsequent transactions. The layout options as shown in Invention II may be clearly used in any system that calls for several options to be displayed. The Invention of Group III may be used for any system and is not called for the in Invention of Group III. Invention IV is applicable to any application where a user enters information into the system, including general interfacing technique. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
